ATEA

Product development process

Backlog Refinement – Product Backlog

Product Backlog	Participants	Faciliator

Preparation level 3

- **Purpose**: To represent stories and concepts that are moving up in priority; that needs attention regarding both technical and functional requirements, and/or business alignment.

Local Product Owners

Group Product Owner

Preparation level 2

- **Purpose**: To group the user stories that have been prepared and are ready for evaluation and QA from both - a technical and functional point of view.

Architect and QA Team

Group Product Owner

Preparation level 1

- **Purpose**: To represent user stories that are "ready for development"; that is at a proper level of maturity regarding both technical and functional requirements, and that are prioritized by the Group product owner.
